Research Interests

Broad Areas Quantum learning theory; quantum algorithms and query complexity; Fourier analysis of Boolean functions; property testing; computational complexity; quantum information and cryptography.

Current Focus Currently studying the exact learning of k-Fourier-sparse Boolean functions from uniform quantum examples, and the testing and learning of quantum juntas. The present emphasis is on understanding upper and lower bounds in quantum query complexity, along with the use of Fourier-analytic and related mathematical techniques.

Education

Aug. 2026 – Present **Master of Engineering (by Research), Nanyang Technological University**, Singapore.
College of Computing and Data Science.
Supervisor: Prof. Pranjal Dutta.
Research area: Quantum learning theory and theoretical computer science.
Research topic under development.

Sep. 2021 – Nov. 2023 **PhD in Computer Science and Engineering (Withdrawn), Seoul National University of Science and Technology**, Seoul, South Korea.
Department of Computer Science and Engineering.
Specialisation: Cybersecurity in IoT.
Research topic: *A Smart Contract and Digital Twin-based Heuristic Multi-Cooperation Scheduling Framework for Smart Manufacturing in IIoT Environments*.
GPA: 4.27/4.50 (97.4/100).
Programme discontinued following a change in research direction toward quantum computing.

Mar. 2017 – Aug. 2021 **Bachelor of Science in Computer Science and Engineering, Seoul National University of Science and Technology**, Seoul, South Korea.
Department of Computer Science and Engineering.
Specialisation: Information Security.
Thesis: *Servers–Client Mini-Network Security Prototype Based on VMware and GNS3*.
GPA: 3.64/4.50 (90.2/100).
Rank: 10th among the department's Class of 2021 graduates.

Research & Professional Experience

Mar. 2026 – Aug. 2026 **Invisible Technologies**, Remote (part-time).
AI Trainer (Project-Based).
Evaluated Korean- and English-language large language model outputs for quality, linguistic accuracy, and instruction adherence.

Oct. 2024 – Apr. 2025 **National University of Singapore**, Singapore.
Research Assistant, Centre for Quantum Technologies.
Studied quantum authentication and capability certification in adversarial settings, including proof-of-quantumness-style protocols, unitary inversion, and trap-based verification techniques.

Dec. 2023 – Jul. 2024 **Publishing House of Electronics Industry**, Beijing, China.
Independent Author.
Authored a Chinese-language technical textbook on quantum security, including quantum key distribution, information-theoretic security, and post-quantum cryptography.

Sep. 2021 – Oct. 2023 **Seoul National University of Science and Technology**, Seoul, South Korea.
Ph.D. Scholar, Department of Computer Science and Engineering.
Undertook research training in cybersecurity, cryptographic systems, and distributed computing, including IoT security, blockchain, and digital twins.

Feb. 2022 – Nov. 2023 **Seoul National University of Science and Technology**, Seoul, South Korea.
Assistant Lab Manager, Ubiquitous Computing and Security Lab.
Assisted with grant proposals, project coordination, academic administration, and research collaboration.

Teaching & Academic Services

Mar. 2022 – Sep. 2023 **Teaching Assistant**, Seoul National University of Science and Technology.
Assisted with course administration, student coordination, examination design and logistics, grading, and academic records.

Sep. 2019 – Dec. 2020 **Physics Mentor**, Seoul National University of Science and Technology.
Provided one-on-one undergraduate tutoring in physics fundamentals and problem solving.

Skills

Languages Chinese (Native); English (IELTS 7.0); Korean (TOPIK Level 6).

Programming Python, Qiskit, Java, C++, LaTeX.

Software and Tools Docker, Wireshark, Nmap, Jupyter Notebooks, GNS3, VMware, OpenAI API, Scopus, Web of Science.

Honours & Professional Recognition

Scholarships

2017 – 2021 **Scholarship for Outstanding Achievement for Foreigners**, received each semester during undergraduate studies.

2021 – 2023 **Scholarship for Outstanding Achievement for Foreigners**, received each semester during graduate studies at SeoulTech.

Best Paper Awards

2022 World Congress on Information Technology Applications and Services, Jeju, South Korea.

International Conference on Big Data, IoT, and Cloud Computing, Jeju, South Korea.

- International Conference on Future Information Technology, Applications and Services, Seoul, South Korea.
- International Conference on Computer Science and its Applications, Vientiane, Laos.

Professional Activities

2023
- **Alibaba Cloud Developer Community Blogging Expert**, Alibaba Changfengzhe Program.
- **CSDN Blogging Expert**; more than 20,000 subscribers and approximately 600,000 visits (as reported in the original CV).
- **Examiner**, security section, Korean Information Processing Technology Professional Certification Examination.
